Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first action relating to serial application number 10/605,036, filed 09/03/2003.

Claims 1-25 are currently pending.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

2. Applicant's election without traverse of species 1, fig. 2 in the reply filed on 01-31-2006 is acknowledged. Claims 8 and 13-14 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1-31-2006.

Drawings

3. The examiner has accepted the drawing filed with this application.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 24-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 24, it is not clear as to how the interlocking member that includes a tubular shape and structured to accommodate a screw can also

include a shape of the first and second abutment. It appears that the limitation of claim 24 is part of the inhibiting structure.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by EP (1010613) to. EP (1010613) discloses the claimed invention including the derailleur comprising a motor housing (56) which constitutes a base member having two base housing portions (56a, 56b), a motor enclosed in the spacing between the housing portions; misalignment structure inhibiting structure between the first and second base housing portions.

In claim 2, note the derailleur is a four link mechanism.

In claim 3, note each links has a pivot such that two links portions having a pivot coupled to the drive mechanism and the other two to a chain guide.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 4-7, 9-12 and 15-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP (1010613) in view of Kerdjoudj et al. (D451, 072). EP (1010613) fails to disclose the alignment mechanism comprises an interlock mechanism to

Art Unit: 3682

interlock the first and second base members. Kerdjoudj et al. disclose a housing having a misalignment mechanism comprising an interlock mechanism (not labeled, see attached drawing). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the housing bases of EP (1010613) so that the alignment mechanism include interlocking features in view of Kerdjoudj et al. to make the connection easier and to ease the complexity of assembly.

In claims 6-7, 19-12, Kerdjoudj et al disclose the claimed invention.

In claim 22, note EP (1010613) discloses each of the first and second base members are structured to accommodate a screw (64, 66) extending thererhrough.

In claims 15-21 and 23-25 Kerdjoudj et al. the claimed invention.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taniguchi et al. (5,823,070), Schwital et al. (US 2003/00150059), Kenny et al. (4,616,164), Stuhlmuller et al. (3,919,891), JP (10-181675), JP (2000-266177), Ethington (5,681,234) and Kitamura et al. 96,293,882) disclose a housing casing comprising an interlocking mechanism.
